

PHOTOS & TEXT FOR PRESS RELEASE

Samuel Waldorph is managing director of the Danish SKIOLD group, which is among the leading manufacturers of machinery and equipment for feed millers and livestock producers.

Drawing of the stockfeed plant that VMS and SKIOLD will supply to Ridley, the largest stockfeed company in Australia. The plant will have an hourly production of 30 tons meal feed and 20 tons pellets. The actual production unit is situated between the many silos for raw material and ready feed, which are part of a feed factory.

This feed factory in Australia is constructed with machinery and equipment from SKIOLD, including mills, mixers, dosing and conveying equipment, and plant control system.

Martin Liese, in the middle, with a couple of clients. Liese has built up VMS, which supplies a complete range of machinery and equipment for small and large feed mills for farmers and stockfeed industries in Australia, New Zealand, Papua New Guinea, Malaysia and the Pacific Islands.
